If you have recently attended the TOMs Study Day in Wales, please use this workshop as an opportunity to feedback and share discussions since the event and any challenges with and opportunities to support the collection and use of outcomes data.

If this is a new area, please discuss with your colleagues your reflections on the presentation and what you think would be appropriate next steps. If helpful, please use the following proforma:

<table>
<thead>
<tr>
<th>What is my service/what am I currently doing?</th>
<th>What more could we/I do (now and in the future)?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

<table>
<thead>
<tr>
<th>What support do we/I need?</th>
<th>How will we/I know that what we/I do makes a change for the better / demonstrates improvement?</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

My next steps in sharing these ideas and developing a local action plan:

Please keep this for your own reflections
