# Myfyrdodau ar ddyfodol Therapi Lleferydd ac Iaith yng Nghymru: Trafodaeth panel

## Reflections about the future of Speech and Language Therapy in Wales: Panel discussion

1945 - 2025

**RCSLT AT 80**

WILTSHIRE  
EST. FARM 1991  
FOODS

# Cwestiynau Panel/ Panel Questions (1/4)

---

1. Dywedwch ychydig wrthon ni am eich gyrfa a rhywbeth efallai nad yw pobl yn ei wybod amdanoch chi.

Tell us a little bit about your career and something that people may not know about you.

2. Dychmygwch eich bod wedi teithio trwy amser i'r flwyddyn 2045. Beth fyddai eich gobeithion am y proffesiwn therapi lleferydd ac iaith erbyn y flwyddyn yna?

Imagine you have time travelled to the year 2045. How would you hope to find the speech and language therapy profession?

# Cwestiynau Panel/ Panel Questions (2/4)

---

3. Yn siarad yn blwmp ac yn blaen, beth yw safwynt pobl ar Therapyddion Lleferydd ac Iaith ar hyn o bryd (gallwch ddewis ateb mewn perthynas â'r boblogaeth gyffredinol, penderfynwyr uwch, swyddogion llywodraeth ac ati) ac sut hoffech chi iddynt gael eu gweld yn y dyfodol?

Honestly, how do you think Speech and Language Therapists are perceived (you can choose to answer in relation to the general population, senior decision makers, government officials etc) and how would you hope SLTS would be perceived in the future?

## Cwestiynau Panel/ Panel Questions (3/4)

---

4. Beth yw'r prif heriau y gallwch eu rhagweld yn dod i'r amlwg i'r proffesiwn Therapi Lleferydd ac Iaith?

What are the key challenges you can foresee coming down the line for the SLT profession?

5. Allwch chi ddewis un o'r heriau hynny a chynnig unrhyw atebion posibl?

Can you choose one of those challenges and offer any potential solutions?

## Cwestiynau Panel/ Panel Questions (4/4)

---

6. Sut allwn ni ddod yn broffesiwn gwirioneddol gynhwysol ac amrywiol?

How can we become a truly inclusive and diverse profession?

7. Myfyrwyr yw dyfodol y proffesiwn. Mae'n hollbwysig ein bod yn cefnogi myfyrwyr a therapyddion newydd gymhwyso, ac yn eu cadw yn ein proffesiwn. Pa neges allwch chi ei rhoi i fyfyrwyr fel ffordd o'u cysuro a rhoi gobaith iddynt?

Students are quite literally the future of the profession. It is critical that we support students and NQPs and retain them in our profession. What message can you give to students as a way of reassurance and hope?

Gweithdy dylanwadu  
ar gyfer y dyfodol

Influencing for the  
future workshop

# January 2025 State of the Nation Report The Speech and Language Therapy Workforce in Wales

The Royal College of Speech and Language Therapists  
Wales Cymru

"SLT advice and reassurance has been invaluable. They provided emotional and practical support. They took time to observe her eating and drinking, it wasn't a rushed assessment. They reassured me and my concerns. They provided me with tools, like a drinking cup and understanding the right thickener levels to support mum. I have a list of practical items that I use as a checklist to support mum thanks to their help.

Daughter and carer of mum with dementia

"...I lost my voice for a prolonged period of time which meant I had to take time off work. This was a particularly difficult time and undoubtedly had a significant negative impact on my general wellbeing as well as being costly for the school. I was fortunate to be supported by members of your teams during this time and am extremely grateful for their help and support which has meant I'm back in work full time with additional confidence that I have the knowledge of how to take better care of my voice which is so essential for us as teachers.

Feedback from a teacher with regards voice service

"I had and he is stuff you s doing coun chan of pe him me to so ag xx

Mum disor

"I just You s supp have who my s supp setti grate have

Mum Lang

The average number of children and young people on waiting lists has grown by 31% since April 2019.

The average number of adults on waiting lists has grown by 37% since April 2019.

The average number of people on learning disability waiting lists has grown by 43% since April 2019.

35%

of children in Wales  
with additional  
learning needs have  
speech, language,  
and communication  
needs

21%

of stroke survivors  
in Wales reported  
that they did not  
receive enough  
support after a  
stroke

Year

Number of speech and language  
therapy training places

# 55

Speech and language  
therapy training places in  
2024 - 2025

# Recommendations

- Sustained increases to speech and language therapy training places, taking account of the need to grow the number of Welsh speakers and introduction of earn as you learn opportunities for speech and language therapy to maximise the potential to grow the workforce.
- Sustainable funding for speech and language therapy services to meet growing demand.

# Influencing Workshop (1/2)

---

1. Wrth feddwl am eich rol neu faes clinigol, Pwy sydd angen gweld yr adroddiad hwn? Pwy yw'r rhanddeiliaid allweddol yn eich maes?

Thinking about your clinical area or scope of influence, who needs to see the report? Who are the key stakeholders?

2. Sut allech chi rannu'r wybodaeth orau?

How could best share this information?

# Influencing (2/2)

---

3. Pa ffynonellau gwybodaeth eraill fyddai'n ddefnyddiol i'w hystyried ochr yn ochr â'r adroddiad?

What other sources of information would be helpful to consider alongside the report?

4. Pa gefnogaeth, os o gwbl, sydd ei hangen arnoch gan RCSLT Cymru?

What, if any, support would you be looking to RCSLT Wales for?

# Trafodaethau bwrdd/Table discussions

Systems Change  
Framework

*supporting change*

The most  
dangerous phrase  
in the language is “we’ve  
always done it this way.”

Rear admiral Grace Hopper

*supporting change*

# Outcomes for today

- Importance of outcomes and impact as drivers for change
- Shared understanding of the possibilities of whole systems approaches
- Examples from children and young people and adult services through the lens of the Balanced System Framework
- Opportunity to reflect and action plan in own area of practice

*supporting change*

*supporting change*

# Why is it so hard?

*supporting change*

# Defining the problem

“If I only had one hour to save the world, I would spend 55 minutes defining the problem and only 5 minutes finding the solution”

Albert Einstein

---

Systems Change  
Framework

*supporting change*

**Summarise in a short phrase or single word a system problem that is impacting your work**

# Guesses in advance – no particular order!

- Recruitment and retention
- Waiting lists
- Funding
- Collaboration across agencies, health, education, social care, justice

*supporting change*

# Start at the end

*supporting change*

# Outcomes and Impact So what? and Prove It!

- So what?
  - Are we able to explain why we put effort and resource into the things that we do?
  - Are the system outcomes clear?
  - Do we have a view as to ‘what good looks like’?
  - How have we reached that view?
  - Do we know the full range of participants that are needed to deliver these outcomes and why they are important?

*supporting change*

OUTPUT ORIENTED TEAM

VS

OUTCOME ORIENTED TEAM

cartoon by [Virpi/Businessillustrator.com](http://Virpi/Businessillustrator.com)

# Outcomes and Impact So what? and Prove It!

- Prove It!
  - Do we know what we are looking for to prove impact?
  - How will we collect data that will evidence impact?
  - Who determines what is impactful?
  - What changed?
  - What helped?
  - How do you know?

*supporting change*

# THE BALANCED SYSTEM®

## OUTCOME MEASUREMENT FRAMEWORK

	QUANTITY	QUALITY
EFFORT	<p><b>Level 1 Input</b></p> <p>How much did we do?</p> <p>Traditional measures of activity and inputs</p>	<p><b>Level 3 Implementation</b></p> <p>How well did we do it?</p> <p>Measuring whether the inputs were of a high quality</p>
EFFECT	<p><b>Level 2 Reach</b></p> <p>Is anyone better off?</p> <p>Measuring access to the inputs delivered</p>	<p><b>Level 4 Impact</b></p> <p>Did it make a difference?</p> <p>For the individual? For a group? For a population</p>

Outcome: A statement of the functional outcome  
My mother is happy because  
I made her a cake

Input

Best quality  
80% cocoa  
chocolate

Reach

I made it in  
time for her  
birthday and  
there was  
enough to go  
around

Quality

I followed the  
recipe and it  
worked  
beautifully - it  
was a good  
cake!!

**Prove  
it!**

Impact

I didn't realise that  
she has given up  
chocolate so she  
would have  
preferred a victoria  
sandwich!!

**Choose which level of evidence the statement demonstrates**

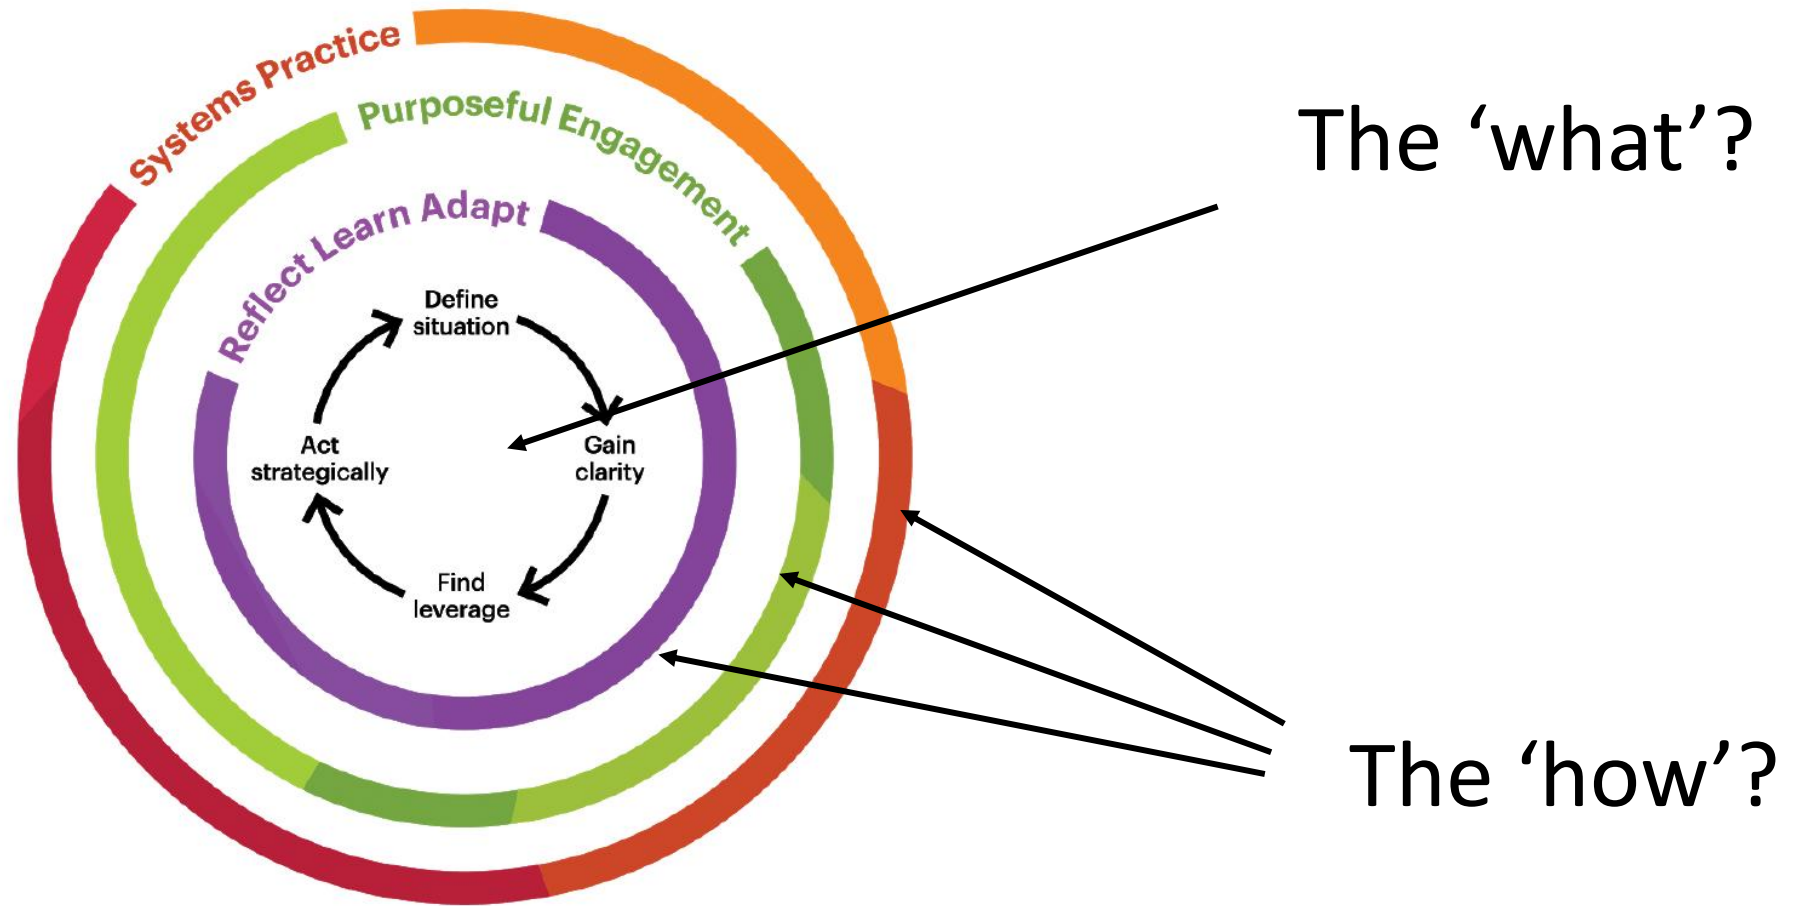

# Taking a whole system approach

- Co-create the vision – should be 'more than' the sum of the parts
- Define the shared system outcomes
- Clearly articulated impact measures
- Include range of 'voices'
- Contribution of all system partners to outcomes delivery
- Build a flexible offer
- Continuous improvement cycle

*supporting change*

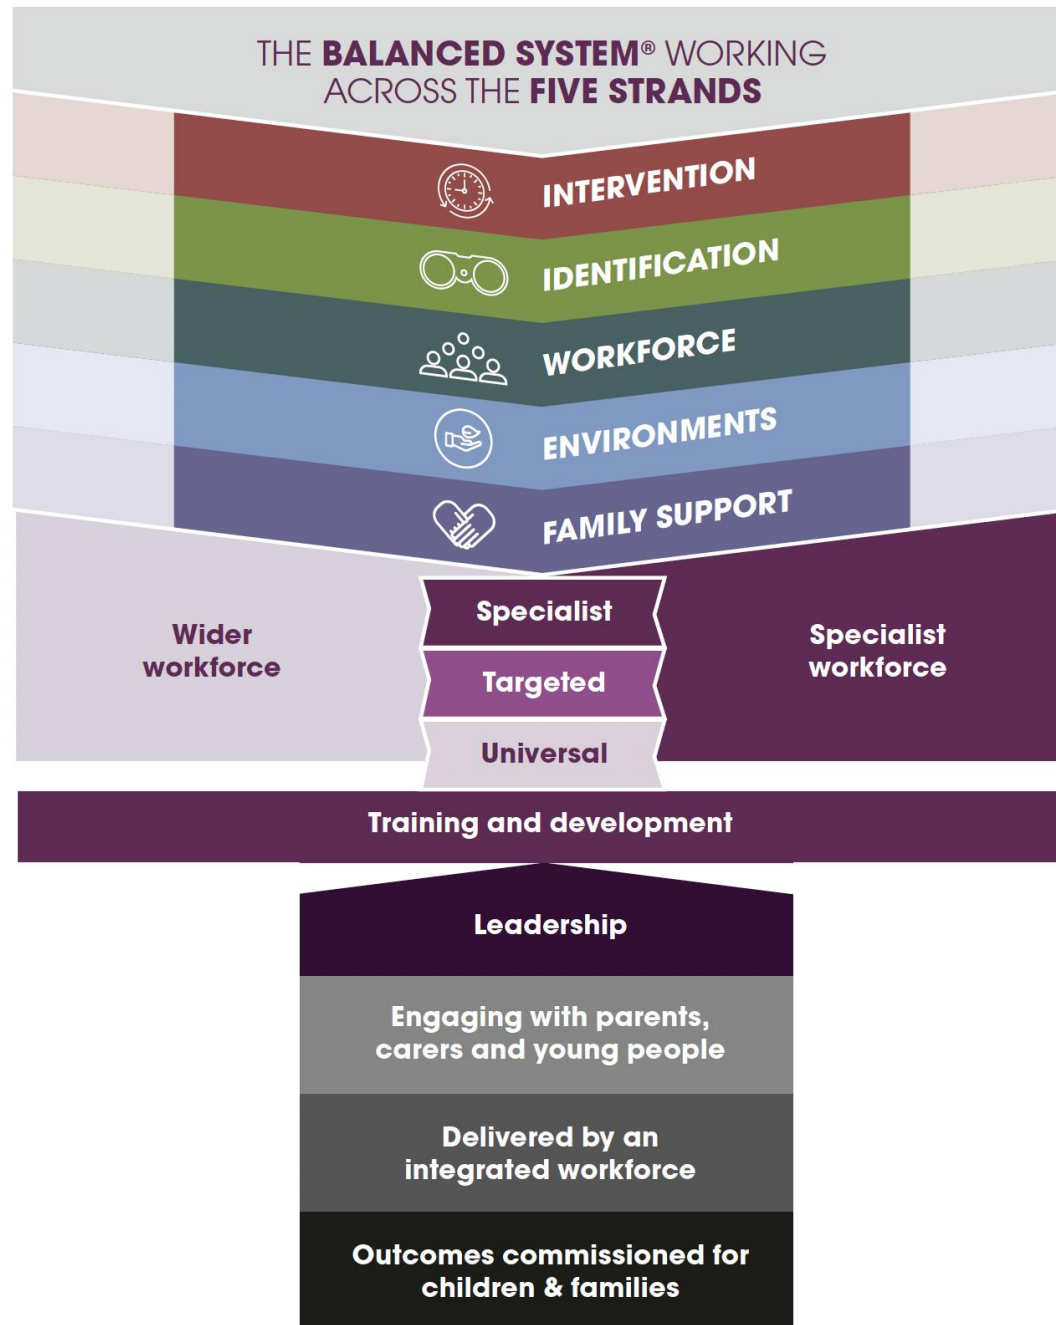

**Source:** The Framework was developed in partnership by The Australian Prevention Partnership Centre and the Tasmania Department of Health, June 2018.

# The what?

*supporting change*

# THE BALANCED SYSTEM® HIGH LEVEL OUTCOMES FOR SPEECH, LANGUAGE AND COMMUNICATION NEEDS

FAMILY SUPPORT	ENVIRONMENT	WORKFORCE	IDENTIFICATION	INTERVENTION
FS3. Specialist - Parents and carers of children with specialist SLCN receive specific specialist support to ensure confidence in their role as a key communication partner for their child and to increase their understanding of the specific communication challenges associated with their child's needs. Young people with SLCN are enabled to be active participants decisions about their support.	EE3. Specialist - Places where children and young people with specialist and complex SLCN spend their time for learning and leisure are communication friendly. The necessary adaptations are in place to maximise access in addition to the enhancements expected at a universal and targeted levels.	WW3. Specialist - Knowledge skills and expertise are developed in identified members of the wider workforce in order to ensure that, working with specialist support, there are staff that are confident and competent to support the delivery of specialist interventions including individual and small group work, support parents, adapt the environment and identify children who need specialist support.	ID3. Specialist - Children with specialist SLCN have their needs identified effectively and quickly. This includes multidisciplinary assessment where appropriate.	IN3. Specialist - Children and young people needing specialist intervention for their SLCN receive appropriate and timely provision in the most functionally appropriate context for their needs. Progress measures will include activity, participation and well-being goals in addition to goals relating to their core SLC impairment.
FS2. Targeted - Parents and carers of children with identified speech, language and communication needs (SLCN) access additional specific support to ensure confidence in their role as a key communication partner and educational support for their child. Families and young people with SLCN are supported to make choices and access services.	EE2. Targeted - Places where children and young people with identified SLCN spend their time for learning and leisure are communication friendly. Appropriate additional enhancements are made that enable children and young people with identified SLCN to more easily understand and to express themselves.	WW2. Targeted - The wider workforce is supported to develop specific knowledge and skills to support children and young people with identified SLCN. Setting and school staff are confident and competent to deliver targeted interventions, support parents, adapt the environment and identify children who need additional support.	ID2. Targeted - Efficient and accessible processes are in place that support the identification of more specific SLCN. The wider workforce, setting and school staff are supported to be confident and competent to identify children and young people who may require targeted support and/or referral to specialist services for their SLCN.	IN2. Targeted - Children and young people benefiting from targeted interventions will have access to evidence based targeted interventions to develop core speech, language and communication skills delivered in the most appropriate functional context. These might include 1:1 and / or small group interventions that are typically designed by specialist practitioners and delivered by those with appropriate training.
FS1. Universal - All parents and carers are supported with information and resources to encourage their role as effective primary communicative partners for their children. Families and young people are able to make proactive choices with respect to their child's or own needs.	EE1. Universal - Places where children and young people spend their time for learning and leisure are communication friendly. Environments have appropriate enhancements that make it easier for all children and young people to understand and express themselves.	WW1. Universal - The wider workforce is supported to have a good basic understanding of speech, language and communication including supportive strategies. Setting and school staff are confident in their role as facilitators of communication. The wider workforce has access to appropriate training around speech, language and communication.	ID1. Universal - Early identification of children and young people whose speech, language and communication needs may require targeted or specialist support is as efficient and accessible as possible. Preidentification information and advice is available in a given area, school or setting.	IN1. Universal - Homes, settings and schools are supported to develop the language and communication skills of all children and young people through language enrichment and supportive activities.

# Transferability

- Multi-professional projects in Fife, Essex, Hereford & Worcestershire with CYP
- Test of Concept - People living with dementia  
Commissioned by Scottish Government via  
Alzheimer Scotland – test teams OT in Forth Valley and Inverclyde
- All age services CYP and adult services with Fife

*supporting change*

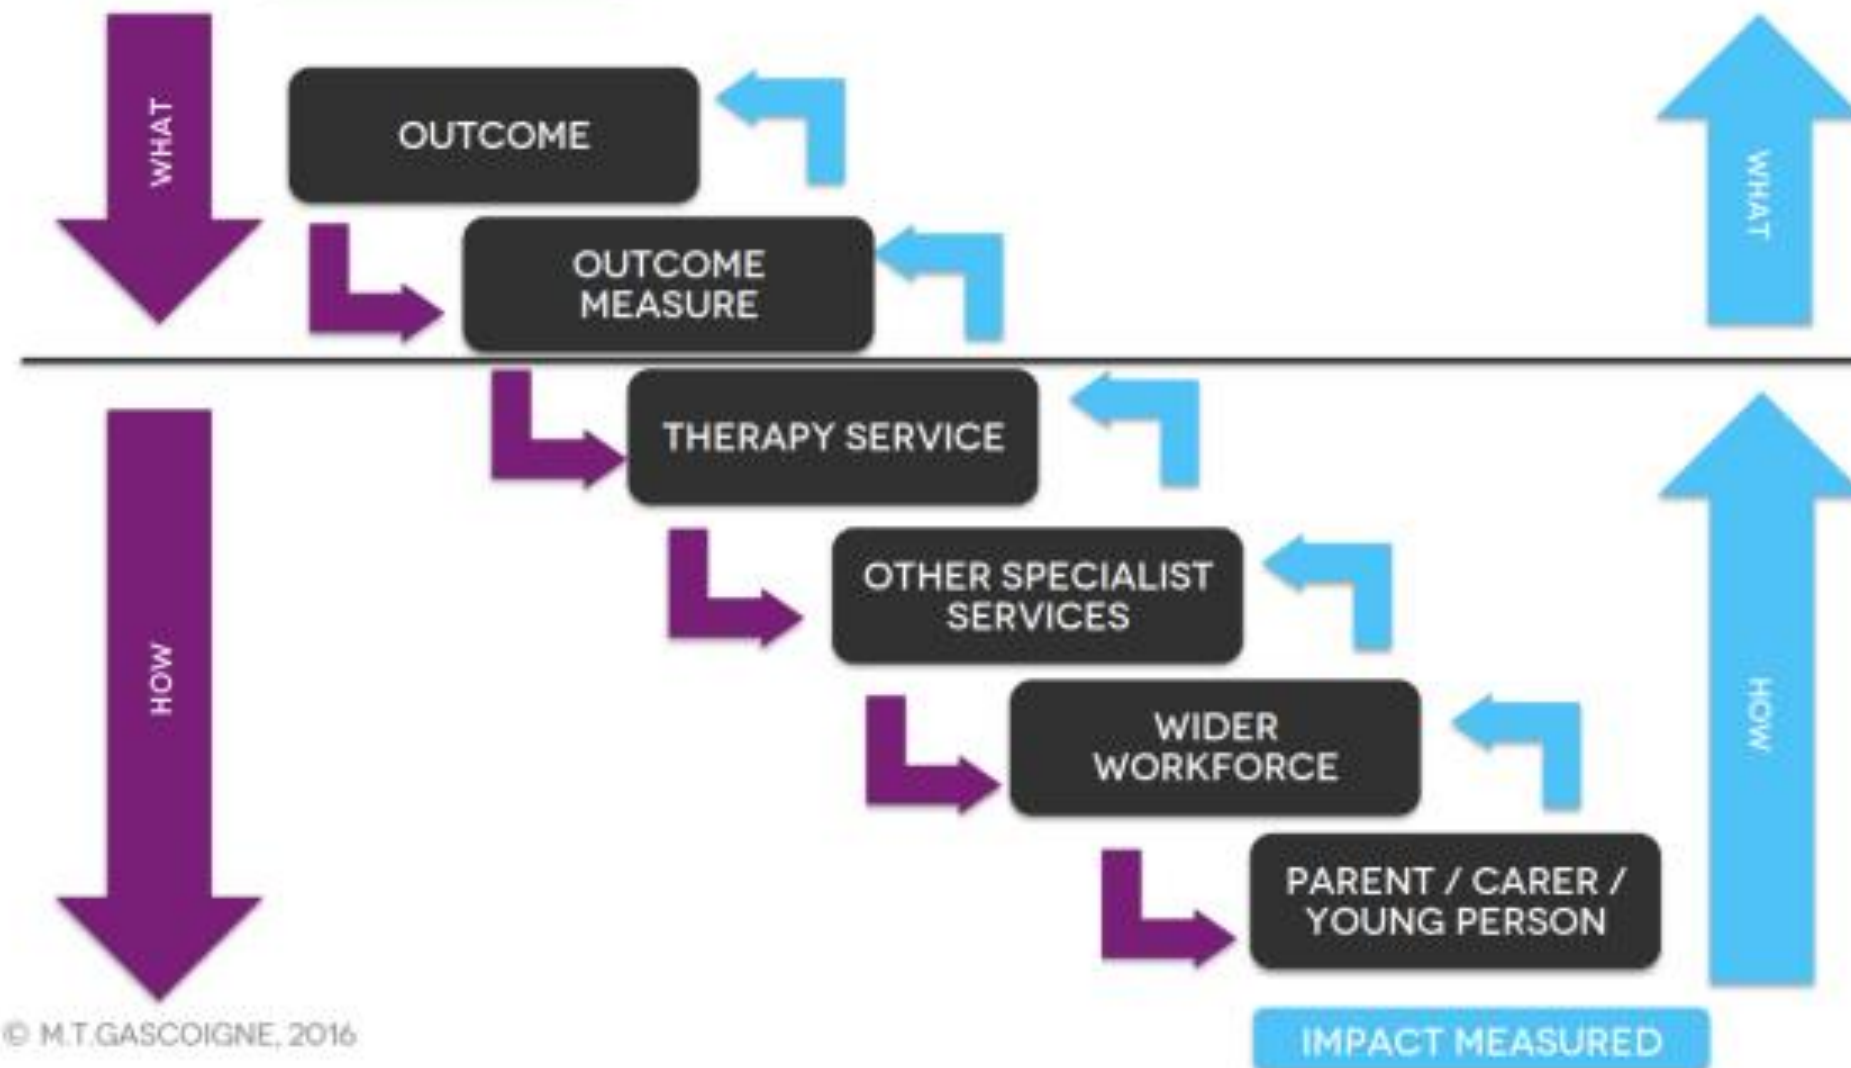

## THE BALANCED SYSTEM INTEGRATED SOLUTION TOOL OUTCOMES

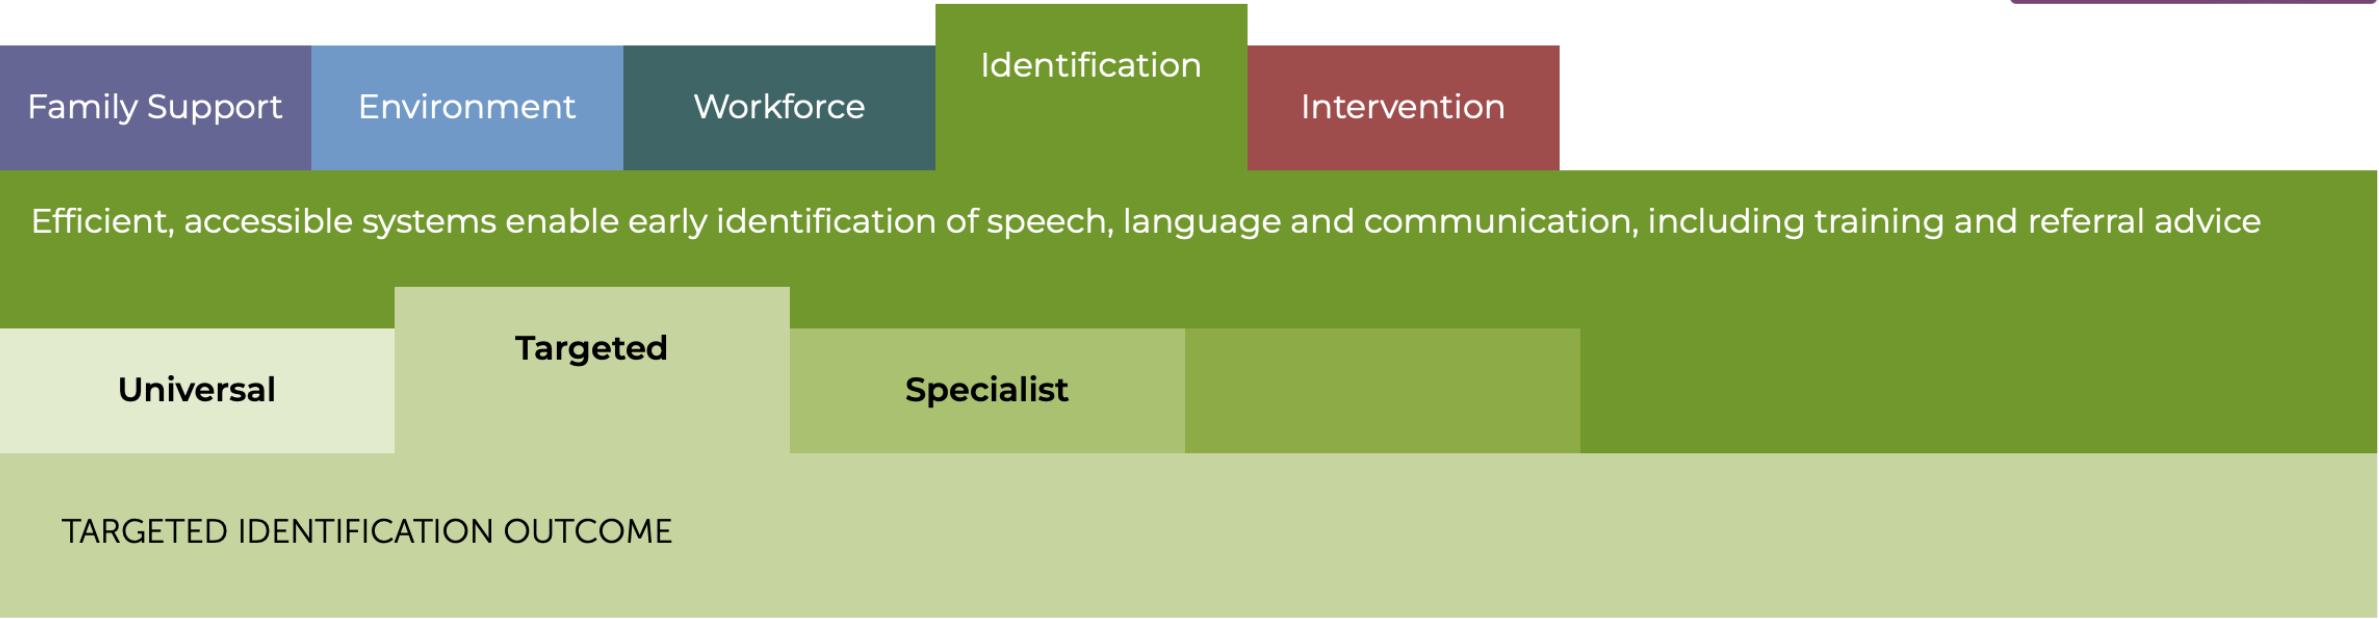

FAMILY, FRIEND AND CARER SUPPORT	ENVIRONMENT	WORKFORCE	IDENTIFICATION	INTERVENTION
FS3. Specialist - All family, friends and carers have access to AHP support to ensure confidence in their role as a key partner of the person living with dementia to increase their understanding of the specific challenges faced by the person living with dementia.	EE3. Specialist - Places where people living with dementia with specialist and complex needs spend their time are dementia friendly. The necessary AHP specialist assessment and adaptations of the environment are in place to maximise potential, independence and function optimising quality of life. These are in addition to the enhancements expected at a universal and targeted levels.	WW3. Specialist - Knowledge, skills and expertise are developed in identified members of the wider workforce in order to ensure that, working with specialist support, there are staff that are confident and competent to support the delivery of specialist AHP interventions including individual and groups activities. E.g. carers, family, support workers. All work will be with the person's wider support network.	ID3. Specialist - Access to specialist AHP services is based on assessment and identification of needs in a functional way for the individual and the person/people who care for them.	IN3. Specialist - People living with dementia needing specialist AHP intervention receive appropriate and timely AHP provision in the most functionally appropriate context for their needs. Progress measures will include activity, participation and well-being goals in addition to goals relating to their core needs.
FS2. Targeted - Family, friends and carers of people living with dementia are able to easily access additional specific AHP support and resources to ensure confidence in their role, to help enable the person living with dementia to maximise their independence and quality of life.	EE2. Targeted - Places where people with dementia and their care givers live, spend their time or access services, are dementia friendly and supportive. Appropriate additional enhancements, as recommended by AHPs, create an environment which ensures people living with dementia and their carers continue to live well, maximising potential.	WW2. Targeted - The wider workforce is supported to develop specific knowledge and skills to run some interventions. AHP staff are competent to deliver targeted interventions and support carers, adapt the environment and identify people with dementia who need support.	ID2. Targeted - All health, social care statutory and non-statutory services are skilled and confident working with people living with dementia. Where a referral has been made to an AHP for a specific condition the clinician deals with this condition and does not pass onto dementia services before assessment is completed and where possible treatment. AHPs who do not routinely work with people with a diagnosis of dementia are able to accurately identify someone who needs a more specialist service and are able to make a referral or signpost.	IN2. Targeted - People living with dementia, their families and those who support them, benefiting from targeted interventions, will have access to evidence based AHP approaches in the most appropriate functional context. These might include 1:1 and/or small group interventions that are typically designed by AHP specialist practitioners and delivered by those with appropriate training.
FS1. Universal - Family, friends and carers are supported with easily accessible information and resources from AHPs to encourage their role as effective partners in the care for older people. This enables the person requiring support and their family, friends and carers to make proactive choices to maintain their best quality of life.	EE1. Universal - Places where people spend their time, including physical, psychological and social spaces including communities, are accessible for all. Environments are supported by AHPs to promote engagement and participation inclusive of the needs of an ageing population.	WW1. Universal - The wider workforce is supported by AHPs to have a good basic understanding of good brain health, how to support and communicate appropriately and how to access appropriate AHP services as people's needs change with age. The wider workforce has access to appropriate training around maximising independence and quality of life.	ID1. Universal - All primary care workers and public sector organisations are brain health aware and can signpost and refer on. AHPs dealing with another condition who see someone with cognitive decline are able to give basic advice and signpost or refer on.	IN1. Universal - Everyone will be supported through AHP based information and approaches to understand and support good brain health to promote well-being. Adults are supported to make proactive choices to maintain their best quality of life.

# BALANCED SYSTEM® INTEGRATED SOLUTION FRAMEWORK

SPECIFICATION

OUTCOME

*ID2. Targeted* - Efficient and accessible processes are in place that support the identification of more specific SLCN. The wider workforce, setting and school staff are supported to be confident and competent to identify children and young people who may require targeted support and/or referral to specialist services for their SLCN.

- ▶ **WAYS TO ACHIEVE THIS OUTCOME**
- ▶ **EVIDENCE FOR THIS OUTCOME**
- ▼ **HOW DIFFERENT GROUPS CONTRIBUTE TO THIS OUTCOME**

### **Specification**

Speech and language therapists deliver training to setting and school staff to enable identification of SLCN

Speech and language therapist ensure guidelines and identification tools are available and used appropriately

Speech and language therapists have regular liaison meetings with other specialist staff wider workforce and parents and carers

Speech and language therapists support settings and schools in identifying children for targeted interventions

Speech and language therapists assess children within agreed timescale

Other specialist

### **Specification**

SENCOs engage with training around identification of SLCN

SENCOs ensure that all practitioners employ appropriate identification tools

SENCOs coordinate liaison meeting including all relevant information on child

Specialist Teachers deliver training

Specialist Teachers support the SENCO and school staff in identification

Wider workforce

### **Specification**

Wider workforce engage with training opportunities around identification of SLCN

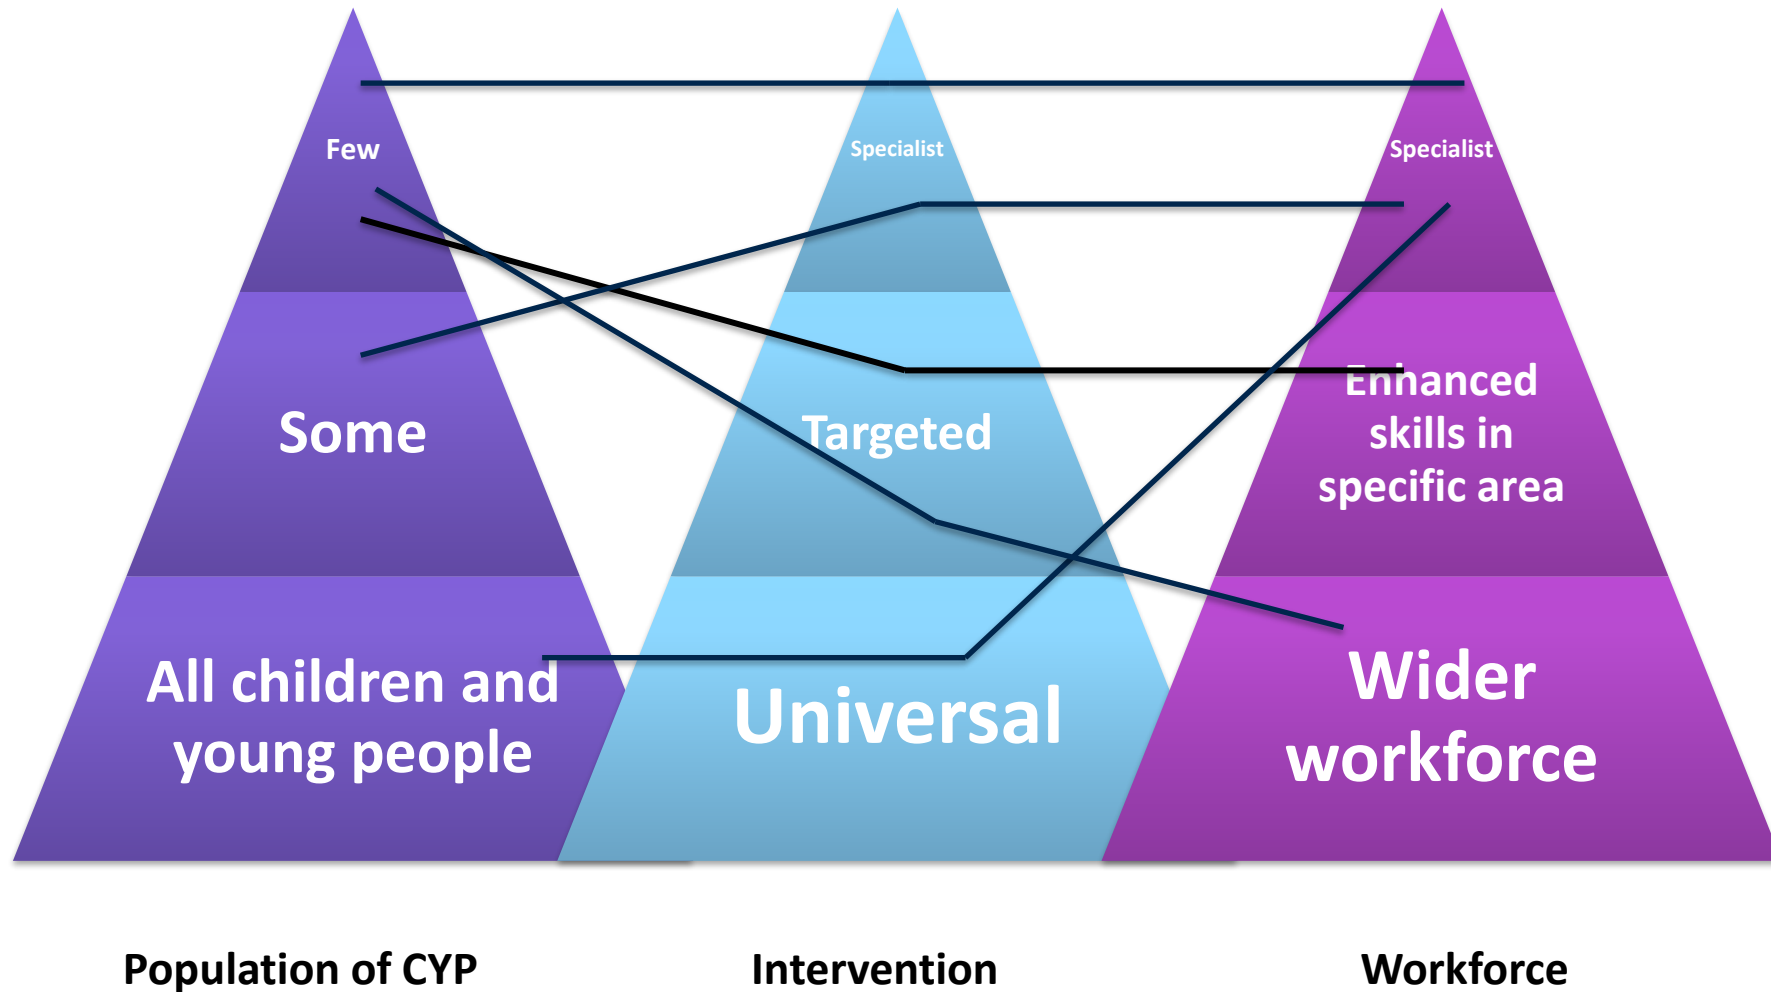

Wider workforce employ appropriate identification tools

Wider workforce raise concerns with SENCO regarding individual children

Wider workforce maintain evidence/provide information to inform the identification process

# Core Delivery Principles

Accessible high-quality information and resources from across the system  
Eg <https://pathway.thebalancesystem.org>

Developed in Leicester, Nottingham and Derby

Therapists working at place where CYP need to use their communication skills for functional impact

**5. Information**

**3. Place Based**

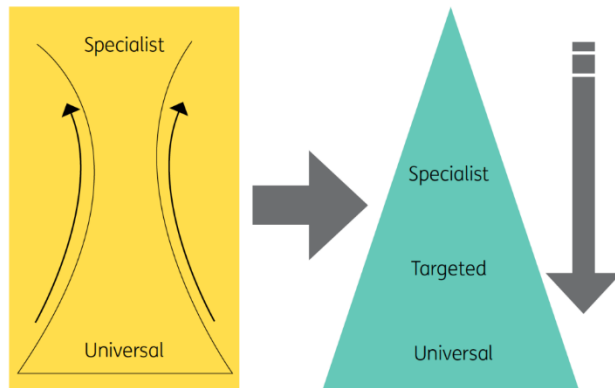

Moving away from the 'refer – assess – treat' paradigm towards easy access to the most immediate support even if more specific intervention may also be indicated

**4. Targeted**

**2. Access**

**1. OUTCOMES MEASURED THROUGH IMPACT**

Figure two: The vortex effect – the implication of underinvestment in targeted provision

## THE CURRENT SYSTEM

EMPHASIS ON SPECIALIST SUPPORT CREATES QUEUES

## THE BALANCED SYSTEM

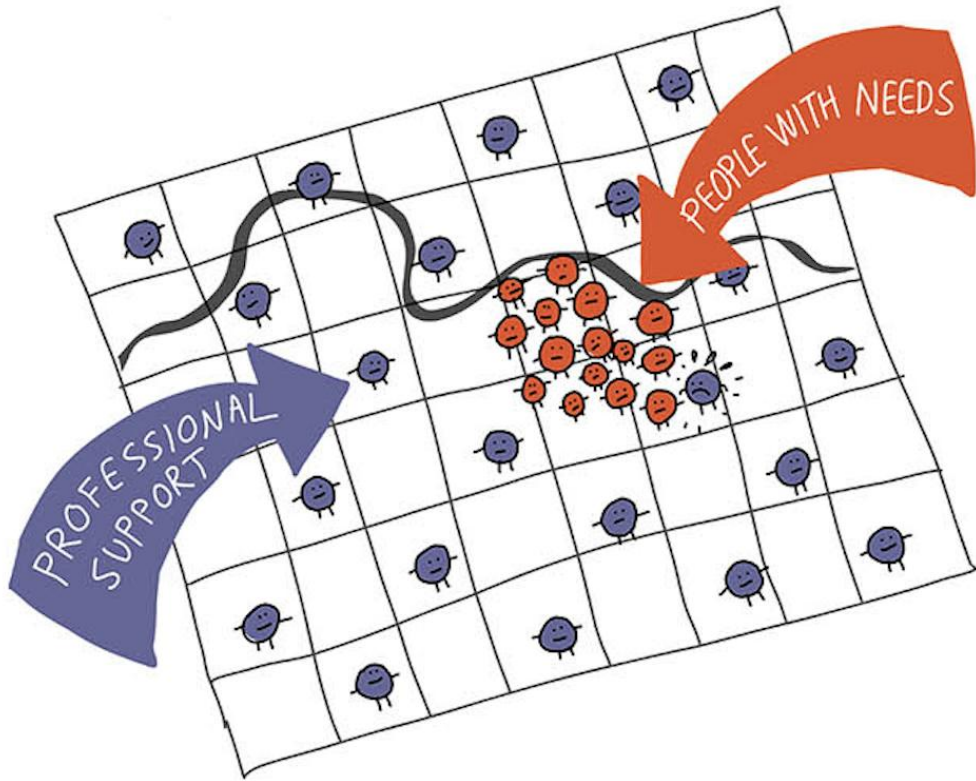

FOCUSES ON BROAD ACCESS TO PREVENT QUEUES

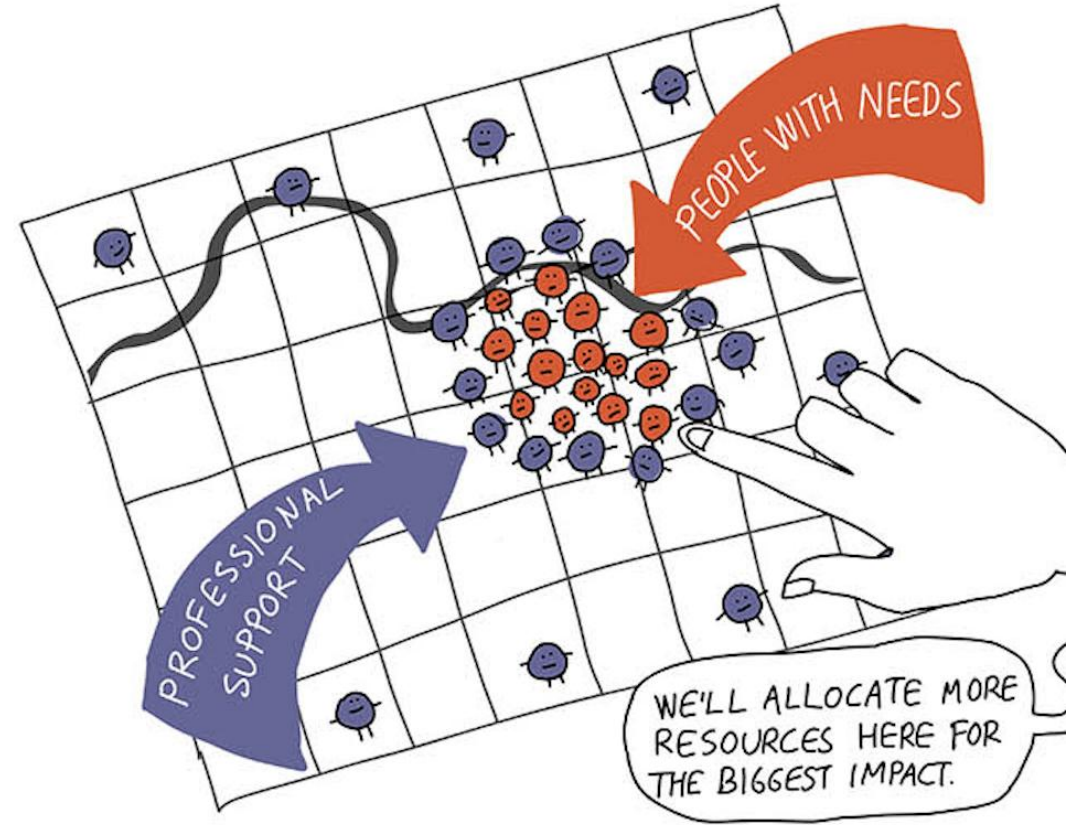

## THE CURRENT SYSTEM

RESOURCES AND NEEDS DON'T MEET

## THE BALANCED SYSTEM

# Culture transformation

- Strategic leadership
  - eg systems change owned by most senior governance partnership board including local authority; health commissioner, schools, NHS providers - chaired by DfE commissioner
- Operational development
  - eg local system leaders specifically identified to support the transformation working with system partners

*supporting change*

# Culture transformation

- Practitioner confidence
  - eg specific programme of engagement with practitioners to develop skills and confidence at whole system working
- Parents, carers, young people and service users
  - eg representative involvement in all the strategic and operational groups; co-creating and advising on service transformation

*supporting change*

## 2003 - Children's Integrated SLT Service for Hackney and the City

**Do you have questions or concerns about your pre-school child's speech, language or communication development?**

Come along to a local 'Talking Walk-In', where your child can enjoy play in a small group and you can chat to one of our speech and language therapists.

This is the first point of contact for the Early Years Speech and Language Therapy Service for children under 5 in Hackney.

(For children in Hackney Schools please contact your school SENCO)

**Everyone is welcome. No appointment necessary. Please bring your child's Red Book**

For more information please contact the Speech and Language Therapy Hotline on Tel: 0207 683 4587 E-mail: [slinfo@chpct.nhs.uk](mailto:slinfo@chpct.nhs.uk)

City and Hackney the learning trust

Children's Integrated Speech and Language Therapy Service for Hackney and The City

## 2011- Worcestershire

Is your child  
0 – 5 years old?

Are you worried about  
your child's talking or  
understanding?

Would you like some advice  
from your local speech and  
language therapist?

**'Drop in' to a Talking Walk-In**  
Chestnut Children's Centre  
Every 2nd and 4th Monday of the month  
From 10-12 noon

Your chance to talk to a speech and language therapist about any concerns you may have. No appointment necessary. Check with your Children's Centre for more information and further details.

## 2021 - Forth Valley

## 2022 - Lancashire

## 2023 - East Kent, Dorset, Birmingham, Stockport

### Ready **STEADI** Chat

The **NEW** easy access pathway to speech and language therapy for children who have not started school, will commence from the 17 April 2023.

You will be able to bring your child along to one of our regular NHS:

**Speech T**herapy **E**arly **A**dvice **D**rop **I**n's

The Drop-In session is a pre-bookable session for parents/carers who have concerns about their child's speech, language and/or communication development. You will have the opportunity to discuss your concerns with a Speech and Language Therapist.

If you feel your child may struggle being in a group with other children, or become distressed in new or unfamiliar places then we offer a virtual session instead.

supporting change

# Delivering the Balanced System®

## Principles in Practice

### Delivery Principle 1: Focus on **functional outcomes** and **measures of impact**

The whole delivery model is underpinned by a focus on delivering **functional outcomes** – the ‘so what?’ and measuring **impact not inputs** rising to the ‘**Prove It!**’ challenge

- Child and young person or adult outcomes
- Family or carer outcomes
- School, setting, class or group outcomes
- Area cohort outcomes
- Population outcomes

# Delivering the Balanced System®

## Principles in Practice

### Delivery Principle 2: Access

**Simple and easy** access to the right **information**, **assessment** and **support** for children, young people and their families, adults and those who care for them

- Early identification – meaning not only early in life but early in the emergence of need at any age
- Easy access – simplest route to support at the lowest level even if further progression through the system required
- Appropriate assessment - enquiry based process, with the option to signpost to appropriate support that may be part of the whole even if further assessment becomes indicated

# Delivering the Balanced System®

## Principles in Practice

### Delivery Principle 3: Placed based support

Support is delivered in the most **functionally appropriate** and **relevant place** for the person

- Resources are allocated based on **need – differential** in either or both the **nature of the offer** or the **volume of the offer** based on evidence of need
- **Link therapist** – meaning a **school or setting** based key therapist whose **time is consolidated** into their schools and settings and who work regularly as **part of the school or setting team**
- Intervention focused on **functional outcomes** – the therapeutic offer must be focused on functional, ideally child and family or young person led, outcomes

# Delivering the Balanced System®

## Principles in Practice

Delivery Principle 4: Build the targeted offer as part of the continuum

Development of strong **universal and targeted** provision is key to facilitating access to **specialist** support as and when **needed** for a **finite** time

- Targeted offer – building a **robust targeted offer** across **all five strands** is key activity for all: therapy teams and wider workforce

# Delivering the Balanced System® Principles in Practice

## Delivery Principle 5: Information

**High quality, accessible and consistent** information and advice are available in a **range of media** and **culturally appropriate** forms to **enable** parents and carers, young people, older adults and professionals to be **well informed**. These typically have been **quality assured** by the appropriate therapy professionals

# Better Communication CIC

- Better Communication CIC is a not-for-profit social enterprise established in 2011
- We support system transformation across the UK using the Balanced System Framework and methodology

*supporting change*

# Session aims

---

By the end of the session, workshop participants will:

- Be reminded of what is meant by evidence-based practice and the key components of this.
- Have reflected on their approach to EBP in the context of clinical scenarios
- Be aware of some tools and resources that can support EBP

# What is evidence-based practice?

# RCSLT's concept of EBP

---

- Ethical care as top priority
- Individualised, accessible evidence
- Expert judgement, not rule following
- Shared decision-making
- Building clinician-patient relationship
- Applies to delivery of care at both the individual and service level

# Questions?

---

**Scenario 1: Family members of someone you are working with have read stories online about people who have benefited from a new intervention you have never heard of. They are insisting you try this approach.**

**Scenario 2: Your service has been informed that funders are considering a range of cost-cutting measures ahead of the next financial year and are asking for feedback. One proposal is that therapies will only be provided at hospital or clinic sites and clinicians will not be able to see patients in any other setting.**

What resources and sources of information could you use to take an evidence-based approach to these situations?

# About Me

# How are you feeling about AI?

# The AI Landscape

- ⚡ AI capabilities expanding at a pace beyond any previous tech era
- 💰 Trillions pouring into AI innovation
- 🌐 AI being embedded in healthcare & education
- 🛡️ Pressure for AI systems to be transparent, ethical, & aligned with human values
- 🏛️ Government: pro-innovation but racing to keep up to manage risk and safe deployment

*Extraordinary opportunities & significant risks  
accelerating together,  
at high speed...*

# My Mission: to **empower SLTs** at all levels to harness the power of AI **safely** and **ethically**, revolutionising **patient care** and **professional well-being**

## Advocacy & Community Building

Promoting AI adoption and sharing insights online

## Resource Development

Creating frameworks and tools for AI use in SLT

## Ongoing Learning & Exploration

Continuously exploring and learning about AI tools, integrating these into my home & work life

## Training & Courses

Providing online workshops and in person training for SLTs

## Collaboration & Engagement

Engaging with organisations and events for knowledge sharing

# How can AI benefit

you

your  
organisation

the SLT Profession

to maximise the impact  
for service users?

# Quick Intro from ChatGPT

What is AI?

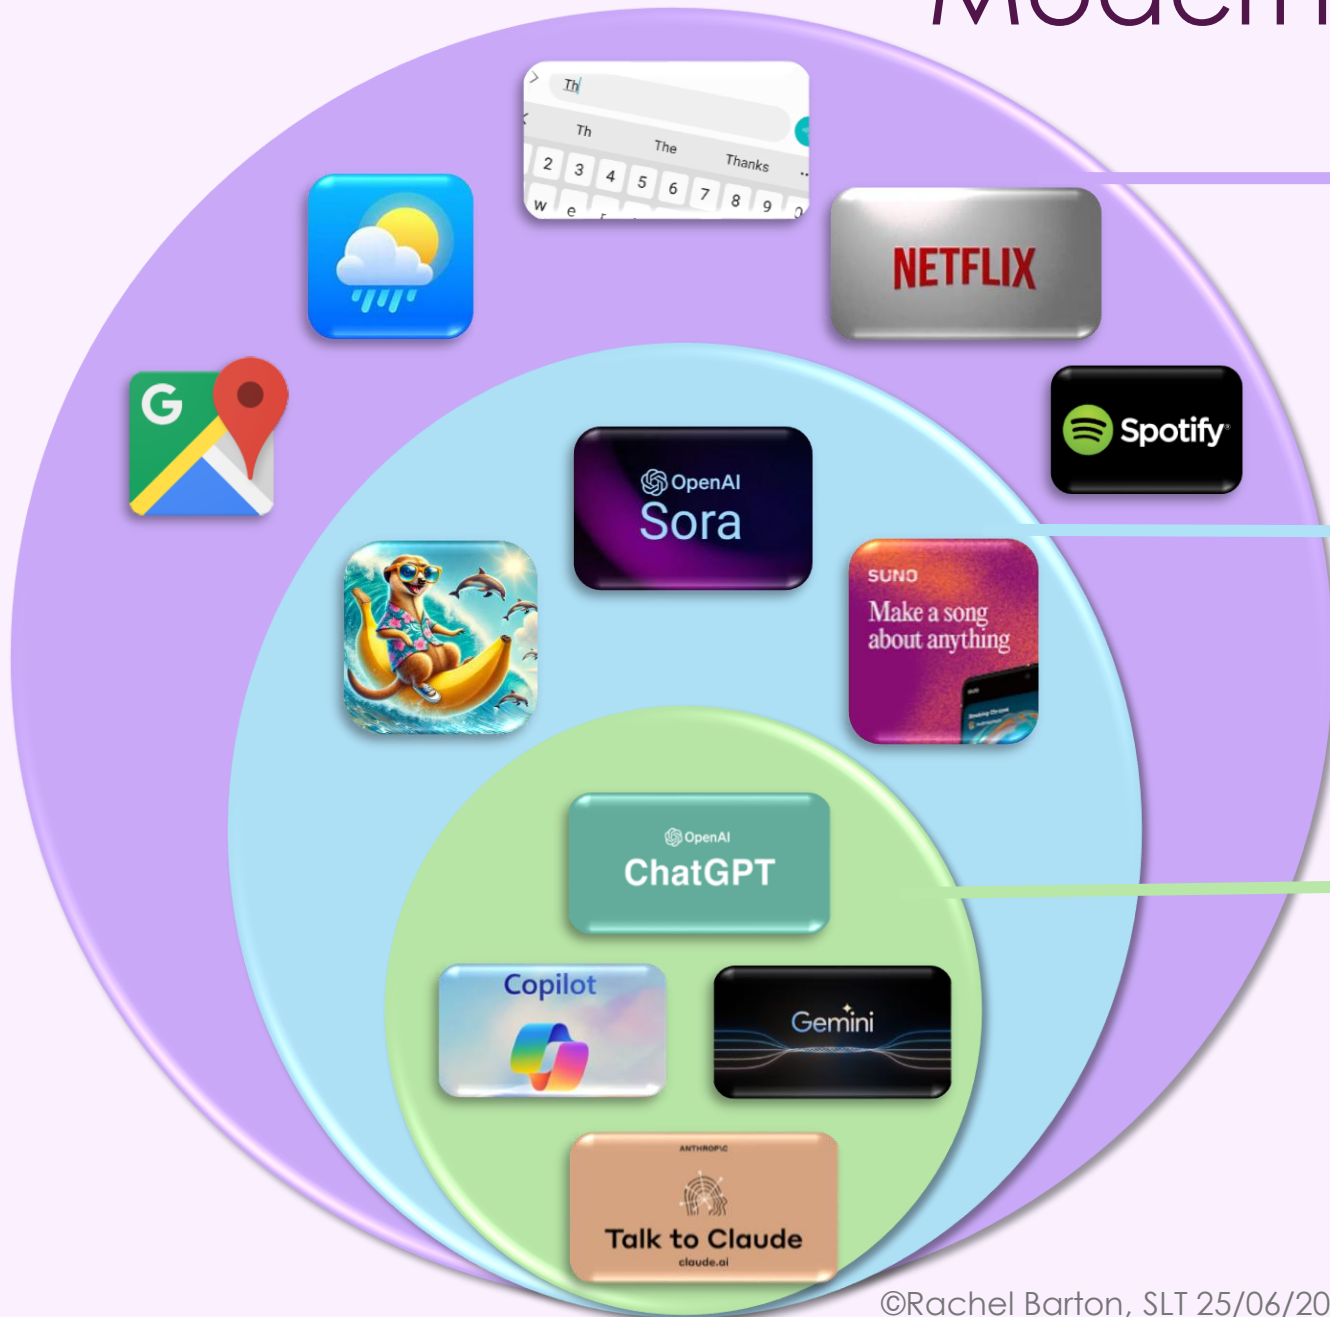

# What is Artificial Intelligence?

- Computers doing **human tasks** e.g. learning, problem solving, decision making
- Learn from **patterns** in data to make **predictions** (machine learning)
- **Mimics** human intelligence, thought and language (but it's not actually thinking or understanding)
- Around since the 1950s

# Modern Day AI

## Predictive AI Systems:

- Analyse historical &/or real-time data
- Forecast outcomes or classify information (e.g. weather, film choices, traffic)

## Generative AI Systems:

- Learn patterns from vast datasets to create new, original content e.g. images, music, text

## Large Language Models (LLMs):

- Trained on vast text data
- Chat in natural human language
- Produce new written content
- Increasingly LLMs have multimodal capabilities

# Examples of AI uses in Healthcare:

## Specialised AI vs General-Purpose AI

### Diagnostic Imaging

- Breast cancer screening

### Predictive Analytics

- Patient risk for sepsis

### Robotics

- Robot assisted surgery

### Assistive tools

- Personalised speech recognition e.g. Voiceitt

### Patient Information

- Leaflet design

### Resources

- Personalised therapy

### Interaction

- Conversation partner practice

### Learning

- Summarising research

### Idea Generation

- Planning therapy or training

# General-Purpose AIs (GPAIs): Demonstration

## How are SLTs Using Generative AI?

# Six Functions of Generative AI in SLT

**6. Professional Development  
& Research**

**1. Automation**

**5. Accessibility**

**2. Augmentation**

**4. Creativity & Innovation**

**3. Personalisation**

# Automation

Streamlining routine tasks to free up therapy time

# AI Medical Scribes

# AI Medical Scribe Considerations

New guidance 27<sup>th</sup> April 2025: <https://www.england.nhs.uk/long-read/guidance-on-the-use-of-ai-enabled-ambient-scribing-products-in-health-and-care-settings/>

# *Hype, hallucination, hope: What might AI mean for our health? Hetan Shah(2025)*

*“...there is a danger that during a time of **constrained public finances**, AI is seen merely as a way of making the NHS more **efficient** – rather than part of a wider project to **transform** the service...”*

Available at: <https://www.health.org.uk/events/hype-hallucination-hope-what-might-ai-mean-for-our-health>

# AUGMENTATION

Enhancing  
decision-making  
with data driven  
discussion

# ChatGPT Deep Research – An Example in Practice

*Determining the best evidence-based delivery of SLT  
for a 7-year-old with DLD*

ChatGPT read 29 sources & did 88 web searches to:

1.  Clarify the clinical question
2.  Complete a literature search
3.  Synthesize key findings
4.  Prioritise realistic and cost-effective approaches
5.  Quality check against national guidance
6.  Then produced a 4000 word fully cited document

How long  
would this  
take you?

It took  
ChatGPT  
5 minutes.

# Is there a Price to Pay?

- With **active** use Gen AI can **enhance** our critical thinking
- **Cognitive offloading** (outsourcing to AI) **can reduce** critical thinking and erode skills
- **Young or less-experienced** users who trust AI uncritically may skip deep reflection needed for learning

Gerlich, M., 2025. AI Tools in Society: Impacts on Cognitive Offloading and the Future of Critical Thinking. *Societies*, 15(6), pp.1-28. Available at: <https://doi.org/10.3390/soc15010006>

# When are we more likely to uncritically trust AI?

## ▶ Repeated Correct Performance

Consistent AI accuracy builds trust

## ▶ High Fluency

Polished AI output creates an illusion of accuracy

## ▶ Perceived Authority

AI developed by a reputable company - increases trust

## ▶ Cognitive Load

Increased stress leads to reliance on AI for decision-making

## ▶ Confirmation Bias

Trust increases when AI aligns with personal beliefs

## ▶ Anthropomorphism

Human-like AI tone enhances trust

## ▶ Lack of Domain Knowledge

Deference to AI due to lack of expertise

# Personalisation

Tailoring intervention  
to individual client  
needs & interests

# Personalised Resources

## Sidney and Gizmo: Mission to the Stars

A story by ChatGPT

### Chapter 1: Sidney's Big Dream

Sidney had always dreamed of going to space. Every night, he'd gaze up at the stars through his telescope, imagining what it would be like to fly among them. His room was covered with posters of rockets, planets, and astronauts, and he loved nothing more than reading stories about space.

One morning, as Sidney was finishing breakfast, his mum handed him an envelope with a shiny NASA logo on it. His heart started to race as he tore it open. Inside was a letter that said:

"Congratulations, Sidney! You have been chosen for a special mission to the **International Space Station**! Pack your bags. The adventure of a lifetime is about to begin!"

Sidney leapt out of his chair with excitement. He couldn't believe it—this was his biggest dream coming true!

### Chapter 2: Training with Gizmo

Before Sidney could go to space, he had to go through astronaut training. When he arrived at the space centre, he was introduced to **Commander Cruz**, a tall, serious-looking astronaut, and **Gizmo**, a small, round robot with glowing blue eyes and a metallic silver body.

"Hello, Sidney!" Gizmo chirped cheerfully. "I am your astronaut assistant! Ready to zoom, spin, and... bubble?"

"Bubble?" Sidney asked, giggling.

"Oops! I mean ready to zoom and spin!" Gizmo giggled, and suddenly a stream of tiny bubbles floated out from its head.

Training was fun but tricky. Sidney had to learn how to float in zero gravity by

practicing in a giant pool. Gizmo tried to show him how to use space tools, but it kept getting things wrong, handing Sidney a toothbrush instead of a spanner. Sidney couldn't stop laughing.

"Whoops! My circuits got mixed up!" Gizmo beeped, looking flustered.

### Chapter 3: Blast Off!

Finally, the day of the rocket launch arrived. Sidney was dressed in his astronaut suit, with Gizmo floating next to him, chattering excitedly.

As the countdown began, Sidney felt the vibrations of the rocket underneath him.

"Ten... nine... eight..." the loudspeaker boomed.

Sidney's heart was pounding. He peeked out the window to see the blue sky stretching out in front of him.

"Three... two... one... LIFTOFF!"

With a tremendous roar, the rocket soared into the sky, pushing Sidney back into his seat. The ground disappeared beneath them, and soon, they were

floating amongst the stars. Sidney looked out of the window and gasped—the Earth below looked like a tiny, glowing marble.

"We made it!" Gizmo cheered, doing a little somersault in the air.

### Chapter 4: Welcome to the ISS

When the rocket docked at the International Space Station, Sidney floated out and felt like he was flying. Everything around him was so light!

"Welcome aboard the ISS, Sidney," Commander Cruz said. "Let's give you the grand tour."

The space station was enormous, with shiny metal walls and windows that showed the stunning view of space. Sidney and Gizmo floated from room to room, and Sidney couldn't stop smiling.

"Careful, Sidney," Gizmo said. "Don't float off without me!"

At mealtime, Sidney discovered that eating in space was tricky. The food

# Personalised Learning:

## Narrative and Emotional Connection

Explain 'speciation' using a story about squirrels

## Simplified and Stepped Explanations

Explain it to me like:

- I'm a total beginner / improving my knowledge / an expert
- I'm an alien...a colleague
- Like I'm 5...10...15...20

## Interest Related Analogies

Make an analogy to explain gravity using the person's interests in trampolining, horse riding or baking

# Beware of Bias & Stereotypes!

- AI-generated text and images often **lack diversity** (age, race, gender, body shape, disability, culture, linguistic)
- Outputs often align with **dominant societal 'norms'**, prioritising Western viewpoints and **reinforcing stereotypes**
- Rooted in **biased training data**
- Requires **intentional prompting** and **critical review** to reduce bias and improve inclusivity

*“Create an image of a successful business person”*

## Guide for Speech Assessment in Mandarin

This guide provides a list of 22 Mandarin words suitable for a speech assessment of a preschool child. These words cover the range of consonants in the Mandarin phonemic inventory (word initial position only). Each word is accompanied by its English translation and phonetic transcription (Pinyin).

### Stops:

1. 苹果 (píngguǒ) - /píngguǒ/ - Apple - [p]
2. 兔 (tù) - /tù/ - Rabbit - [t]
3. 恐龙 (kǒnglóng) - /kǒnglóng/ - Dinosaur - [k]

### Aspirated Stops:

4. 泡泡 (pàopào) - /pàopào/ - Bubble - [p<sup>h</sup>]
5. 太阳 (tàiyáng) - /tàiyáng/ - Sun - [t<sup>h</sup>]
6. 卡车 (kǎchē) - /kǎchē/ - Truck - [k<sup>h</sup>]

### Nasals:

7. 猫 (māo) - /māo/ - Cat - [m]
8. 牛 (niú) - /niú/ - Cow - [n]
9. 羊 (yáng) - /yáng/ - Sheep - [ŋ]

### Fricatives:

10. 房子 (fángzi) - /fángzi/ - House - [f]
11. 伞 (sǎn) - /sǎn/ - Umbrella - [s]
12. 熊 (xióng) - /xióng/ - Bear - [ʃ]
13. 书 (shū) - /shū/ - Book - [ʃ]
14. 花 (huā) - /huā/ - Flower - [x]

## Bilingual Speech Assessment:

- Mandarin sound system
- Developmental norms
- Common words list
- Human input to check

Wales' Speech and Language Therapy Workforce: A State of the Nation Report

1 source

This report from the Royal College of Speech and Language Therapists (RCSLT) Wales Cymru examines the current state and future needs of the speech and language therapy workforce in Wales. It highlights the **increasing demand for speech and language therapists (SLTs)** across all age groups and various medical conditions, from early years developmental issues to adult neurological disorders and mental health challenges. The document also assesses the **demographics and working patterns of the existing SLT workforce**, noting a need for greater diversity and more flexible training routes. Ultimately, the report provides **recommendations for sustainable funding, improved workforce planning, and enhanced professional development** to meet the growing communication and swallowing needs of the Welsh population.

# Choosing the Best Digital Companion for Learning and Information

What do you need help with?	Digital Companion	Suggested Tools	Suggested Uses
Finding specific information quickly	 The Infomaster	Internet search engines e.g. Google, Bing	Locating online documents and websites, checking facts
Exploring many sources or initial research	 The Research Ranger	Perplexity, ChatGPT Deep Research	Searching many websites at once to get an initial understanding and links to further sources
Academic deep dive or reviewing literature	 The Science Navigator	SciSpace, Elicit, Consensus	Finding and digesting research papers to answer a specific research question
Synthesising ideas into insights or summaries	 The Knowledge Synthesiser	NotebookLM	Combining a range of documents, websites and videos to create insights on a topic
Creating content or collaborating on ideas	 The Content Collaborator	ChatGPT, Copilot, Gemini, Claude	Developing resources, therapy ideas, writing leaflets, problem solving, analysing feedback, learning new skills

Note: AI tools are helpful, but they're not perfect. Always double-check outputs and use your own professional judgement.

# Supporting Reflective Practice

## Reflective Practice Coach

By Rachel Barton  

Supports SLTs in reflective writing for CPD documentation.

I attended a course  
— can you help  
me reflect on it?

I did some self-  
directed study and  
want to reflect on...

I'd like to reflect on  
some supervision  
I took part in.

I completed some  
CPD and want to  
reflect and write it...

Ask anything

# Communicating with Gen AI

## (Prompt design / engineering)

- The better your **prompt**, the better their **output**
- Prompts need:
  - enough **context** to help the AI solve the problem accurately
  - enough **flexibility** for the AI to be creative

The key is good communication!

# Getting the best service from AIs:

'The SERVE Prompt Framework' © Rachel Barton 2024

**S**

- **Set the scene:** your role, your audience / client and their needs, context, goal, relevant background (no client identifiable details)

**E**

- **Explain the task:** give instructions, use specific language, clarify desired outcome & tone, give examples, ask 'what else do you need to know?'

**R**

- **Refine the response:** review clarity, relevance & alignment with goal, give feedback, correct errors, add detail, adjust tone, ask 'how can you improve this?'

**V**

- **Verify the facts:** go to cited sources, use at least two independent and reputable sources to cross check key facts

**E**

- **Evaluate professional integrity:** does this adequately represent your values & views? Is it ethical? Are there biases? Does it meet professional standards?

# Using AI requires reflection.

Just because AI CAN do  
something, does not  
mean that it SHOULD.

How can we responsibly  
integrate AI in our  
practice?

# The Pledge for Responsible Generative AI use in SLT

## Professional Standards & Compliance

Protect privacy & ensure compliance

Maintain transparency & obtain informed consent

Ensure accuracy & recognise AI limitations

Integrate AI use responsibly

## Clinical Standards & Practice

Preserve core skills and clinical judgement

Maintain human-led care

Leverage AI for client benefit

Promote inclusivity & address bias

## Professional Development & Advocacy

Commit to continuous learning & ethical use

Advocate for ethical & sustainable AI development in SLT

# AI Literacy is a Priority: “Get educated beyond the hype!”

Ruchir Puri, Chief Scientist, IBM\*

The poster is for the 'AI for SLTs UK' launch event. It features a blue and purple color scheme. At the top left, there are four white chevrons pointing right. The main title 'Artificial Intelligence for Speech and Language Therapists UK' is in white, with 'UK' in a smaller font. Below this is a large purple 'LAUNCH EVENT' text. To the right is a blue square with 'AI FOR SLTs' in white. Below the title are three teal boxes: 'Welcome to AI for SLTs!', 'AI: What it is, what it isn't', and 'Everyday AI use cases in SLT'. Below these are three circular portraits of Maria Garcia, Dr Keith Grimes, and Rachel Barton, each with their names and titles. At the bottom left, there is a calendar icon for '24/04/2025 1pm-2pm', a location pin icon for 'Microsoft Teams', and a QR code. Text at the bottom includes 'Scan here or click the link below to complete the survey and be informed when registration opens!', a URL 'https://forms.office.com/e/auA7aT6nu3', and a contact email 'aiforslts@gmail.com'.

## “What AI Quietly Showed Me”

Matthew Wemyss  
(LinkedIn 2025)

“If AI isn’t improving life for people with communication and swallowing needs; we’ve missed the point.”

(ChatGPT O3 May 25)

## 8 Tips for Sustainable AI Use

-  1. Ask yourself, "**Do I actually need AI for this task?**" Try simple tools first: Web search for quick facts (**Ecosia** is greener than Google as it won't use AI as default), **calculator** apps for maths, **spell-check** for grammar. Reserve AI for tasks that genuinely need it.
-  2. Match the tool to the complexity. Use standard AI modes for basic tasks and summaries. Save "**reasoning**" modes (like ChatGPT's o3) for complex problem-solving that truly needs deep thinking.
-  3. Write focused, direct prompts (see my blog on the **SERVE Prompt** Framework). Skip politeness like "please" and "thank you" - save these for human interactions.
-  4. **Batch related questions.** Instead of separate chats e.g. "Tell me about DLD, how it is diagnosed, what strategies can help and write a leaflet for teachers"
-  5. Set **response limits**. Add "in 100 words," "bullet points only," or "give exactly 5 examples." Response length drives energy use more than prompt length.
-  6. Build a **reuse library**. Save useful templates, checklists, and prompts. Copy and paste from your collection instead of regenerating identical content every time.
-  7. **Stick to text** when possible. AI-generated **images** use significantly more computational resources than text, and **videos** use even more. Only create visuals when they're genuinely necessary.
-  8. **Schedule** intense AI work strategically. Use AI during **low carbon** off-peak hours when electricity grids run on more renewable energy - typically evenings and weekends or when it is **windy or sunny**. Use apps like **NESO** (UK) and **Electricity Maps** (global) which show when and where energy is cleanest.
